

AUDIO ANYWHERE
SOUNDS SIMPLE,
BECAUSE IT IS SIMPLE.

Mi S E R I E S™

MATRIX MI SERIES AUDIO CONTROLLERS

Matrix solutions bring together all of your music needs into one easily integrated system that can be accessed from anywhere in your home. AMX is the only company that offers a true "retrofit solution," one which allows the replacement of volume controls with Matrix Keypads and Audio Controllers, giving full control over sources.

MI SERIES AUDIO CONTROLLERS

The Mi Series Audio Controller is a feature rich product designed with a focus on reliability, flexibility, performance, and ease of use. The system is tailored to a homeowner's current needs, and can grow with the home and family. The Mi Series modular design is engineered for future technologies so that adding zones, upgrading to LCD Touch Screen keypads, and adding a tuner module or network interface card can be easily accommodated.

PRODUCT HIGHLIGHTS

- 4, 6, or 8 Sources
- 4, 6, or 8 Zones
- Easily expands to 64 zones with Mi Series 4 and 8 Zone Expanders
- 40 Watts per channel
- Macro Capable
- Paging input/output
- RS-232 communication and control port; RJ-11 expansion ports
- Standard room-by-room alarm clock included
- Dedicated IR outputs, audio inputs/outputs (buffered)
- Standard SRS/WOW® technology enhances performance of amplifiers

MATRIX LINE LEVEL CONVERTER

The Matrix LLC enables the installer to add an existing amplifier in a specific zone where additional power is needed, all while maintaining keypad control.

MATRIX STEALTH IR CONTROLLER

The Matrix Stealth IR Controller allows a room to be IR controlled using the Matrix remote. The Stealth incorporates an IR receiver and LED status indicator providing system feedback to the user while eliminating the need for a keypad.

MI SERIES ZONE EXPANDERS

The Mi Series Zone Expanders are used in conjunction with the Mi Series Audio Controllers when additional zones are needed. They are available in 4, 6 and 8 source configurations. Each expansion controller contains 4 or 8 additional zones. Seven expansion controllers can be added to each Mi Series Audio Controller for a total of 64 zones.

Speaker Wire Technology™

Speaker Wire Technology™

With our exclusive Speaker Wire Technology™, control audio via an intuitive keypad interface or the LCD Touch Screen which uses simple four-conductor speaker wire. Speaker Wire Technology is exclusive to Matrix products and allows both data and audio signals to travel over the same four conductors or speaker wire. The versatility of SWT allows Matrix products to be connected where the control wire has been run separately from the audio cable.

SUPERIOR SOUND

Matrix in-ceiling speakers are designed using superior components, providing consumers with great sound at a great price. The architecture of the C Series enclosure incorporates a floating bridge which houses a unique pivoting tweeter assembly that creates directionality for the user.

The C-DT Series Speakers come with a dual tweeter where stereo sound is required, yet there is room for only one speaker. The EL Series Speakers offer exceptional acoustical performance at a modest price. The AMX Matrix Speaker lines are also available with the exclusive SWT Technology which includes an IR Receiver built into the speaker for remote control convenience.

MATRIX KEYPADS AND REMOTES

Both versions of the KP-LCD Touch Screen feature the combined control capability of the navigation and numeric keypads along with the added benefit of visual feedback of system and source information. Two versions are available; a retrofit version allowing the direct replacement of volume controls while utilizing the same wall box, and a flush mount version which includes an easy to fit built in wall mounting system. Each KP-LCD is compatible with all Mi Series 8 Audio Controllers.

All Keypads are available in four colors.

PUSH BUTTON KEYPADS

The KP-4e and KP-6e offer full navigation control through a five way navigation array, decisively representing user direction for controls such as channel up, next disc, next preset and a user assignable center button. The KP-NUM is an optional keypad that allows control of features such as direct access, zone grouping, setting source favorites, alarm clock functions, keypad lockout and recalling presets.
