

keypads & remotes **AMX**

COMMAND

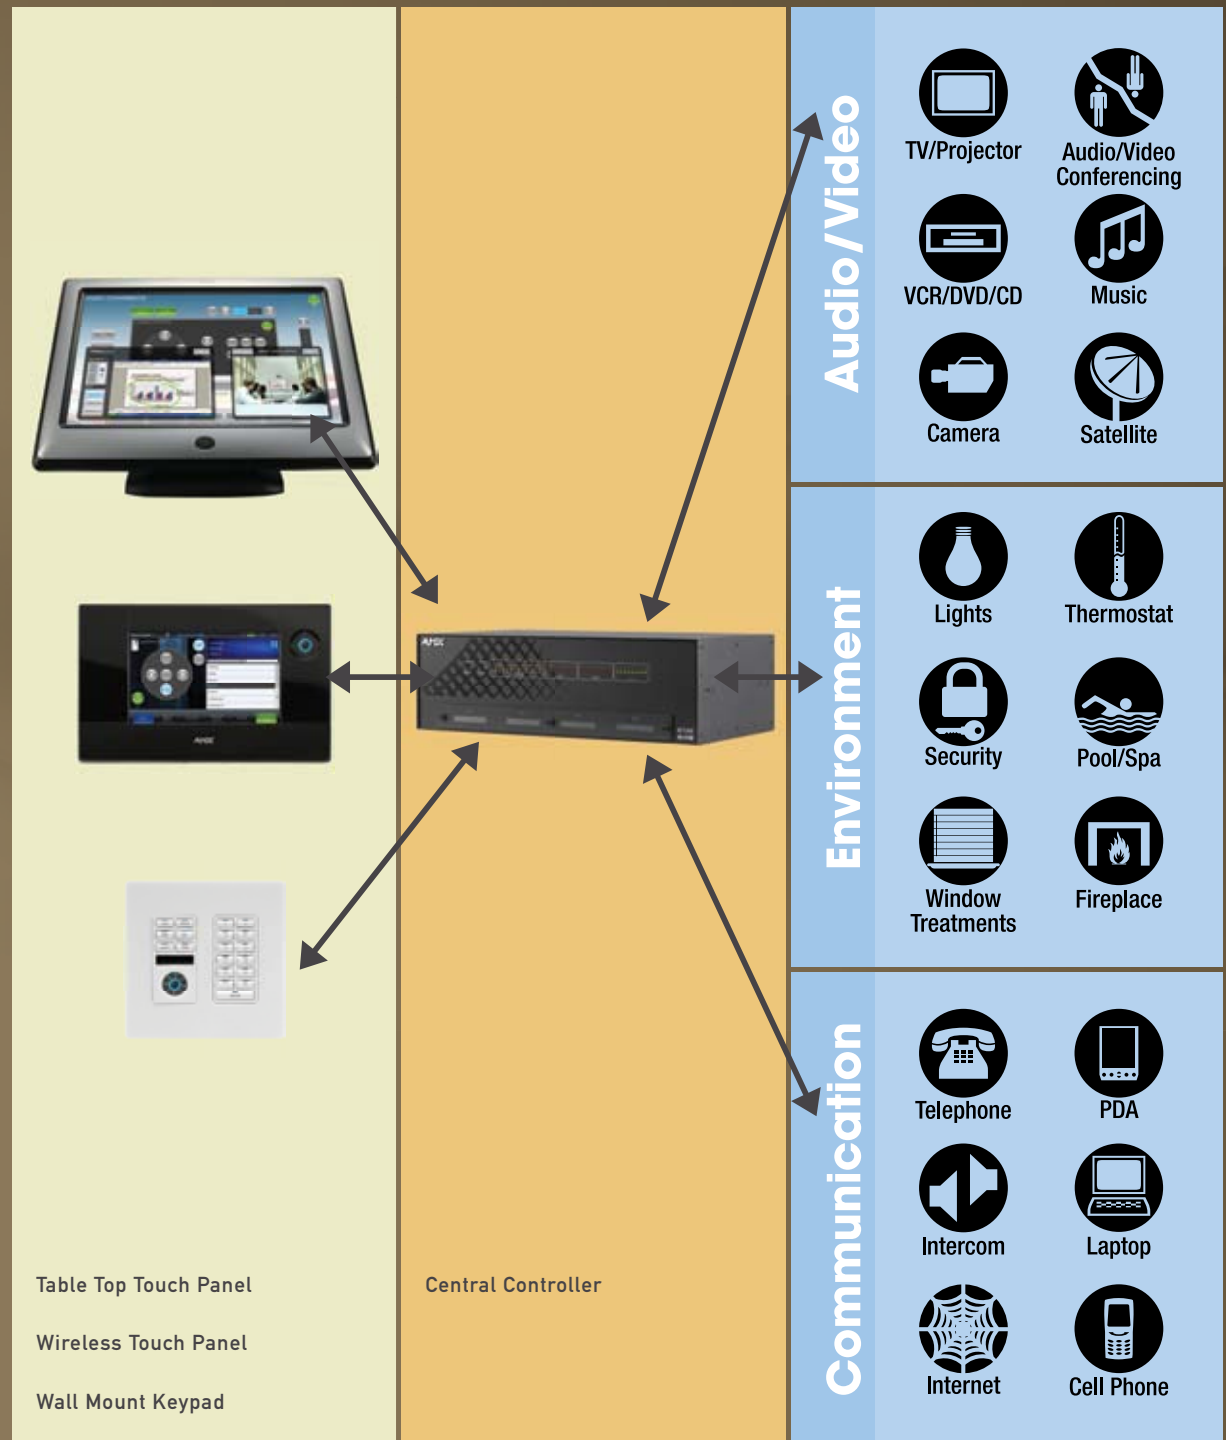

Control system operations begin with the user interface, AMX Touch Panels and Keypads, which use a combination of touch-activated buttons and icons to easily and effortlessly navigate the system and carry out any required command. Whether you need to lower the blinds or launch a fleet of jets, these interfaces are simple to operate, but smart enough to group the hundreds of required steps to deliver instantaneous, automated directions – all with the slightest touch.

CONTROL

From controlling one component to managing 1000 devices, no job is too large or too small for AMX NetLinX Integrated Controllers, the nerve centers of every control system. With smart processors and powerful memory reserves, these controllers can carry out multiple automated command sequences to produce instant, flawless results from the devices they control.

COMMUNICATE

The AMX Control System was designed to communicate with the electronic devices that populate our entire world. From CD changers, plasma screens and jacuzzi jets, to cameras, projectors and communication satellites, AMX is ready to command, control and communicate with life around us – easily, accurately and efficiently.

TRULY ENJOYING THE SOUND OF MUSIC

As you awaken to a soft, amber glow filling the room, you reach over and touch "IPOD" on your Metreau Keypad and are instantly immersed in the opening chords of Vivaldi's "Concerto in G Minor". On your way to the shower, you dial up the volume on your bathroom keypad a couple of more notches - you don't want to miss a single note. With Metreau Keypads, getting more out of life is just a touch away. After getting dressed, you head downstairs to join your kids at the table who are enjoying their cereal while listening to Radio Disney. Another quick press of your kitchen keypad gives you a morning traffic report. As your family heads out the door together, a touch of "AWAY" powers down your house, adjusts the temperature to 78 degrees and arms the security system – with Metreau Keypads, life keeps getting easier.

Honky Tonk Women To Gimme Shelter

With a press to the right, you can skip to the next song on your Rolling Stones' iPod Playlist as well as go left to skip back or up, down and center for menu navigation.

Light It Up

As you crank up the volume, a row of blue LEDs give you a visual indicator of where the volume is going and what level you're at.

"2" For Margaritaville – "8" For Big 80s

Whether you're in the mood for Outlaw Country, Totally 70s or Classic Vinyl, just hit your preset button and your favorite Satellite Radio channel begins playing.

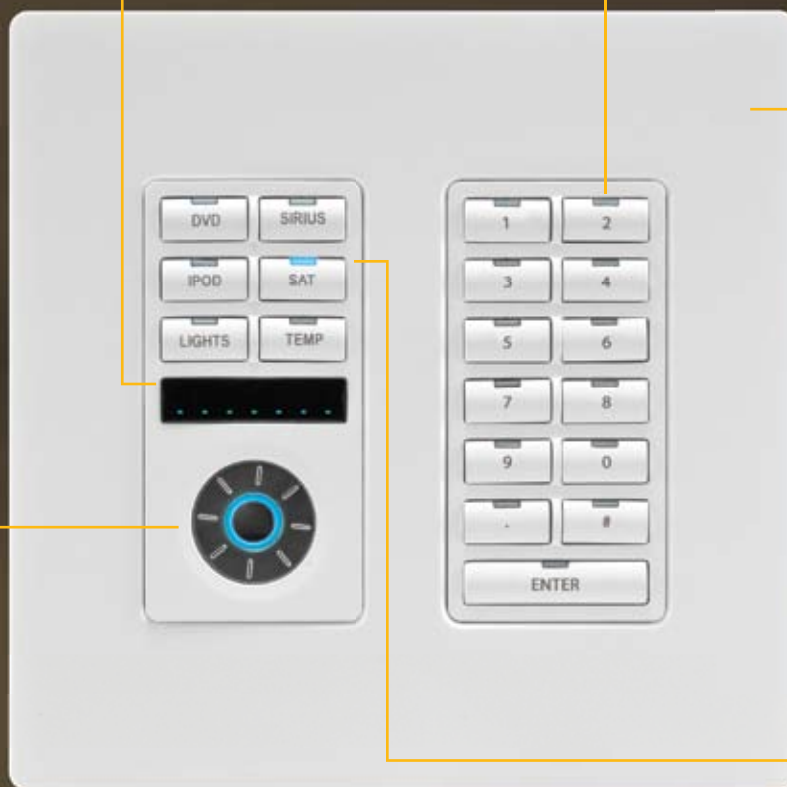

Sophisticated Elegance

Metreau was designed to elegantly blend into decora-style wallplates and are available in black, white and light almond to match a variety of color schemes.

Guiding Light

With several audio sources to choose from on your Tango system, sometimes it's hard to know what you're listening to. A handy blue LED in the top center of each button identifies the currently selected source.

TEACHER'S PET

Classroom resources are no longer limited to overhead projectors and pull-down screens. Modern classrooms include a myriad of devices designed to support the teacher but in reality, can rob them of precious teaching time. But Metreau Keypads change all that with simple, easily identified buttons that in a single touch can execute a variety of tasks to help you reach your end goal. Say you want to show a Discovery Channel DVD that requires powering on the projector, DVD player and audio system, lowering the projection screen, turning out the lights and starting the DVD. With Metreau, a press of "DVD" is all it takes. And volume adjustment and skipping to the next chapter are a simple dial and press away of your navigation wheel. Metreau Keypads - giving teachers more time to actually educate their students.

Go Wireless

When you want to change slides on a PowerPoint from the back of the room, just point your AMX R-1 remote control in the direction of your keypad and the integrated infrared sensor will take care of the rest.

"We Can't Hear It Back Here."

To adjust the volume of your DVD, simply dial your navigation wheel up or down. It's also just as handy to dim room lights.

Help Is Just A Push Away

An uncontrollable fight has broken out in your room and you need help – a push of a button and the principal is immediately summoned.

Password Protected

Need to escort a sick child to the nurse, but worry about idle hands accessing the classroom keypad? Just set up a four-digit password of your choice and when you have to leave the room, your keypad is always locked down.

TOUCH PANEL POWER – KEYPAD CONVENIENCE

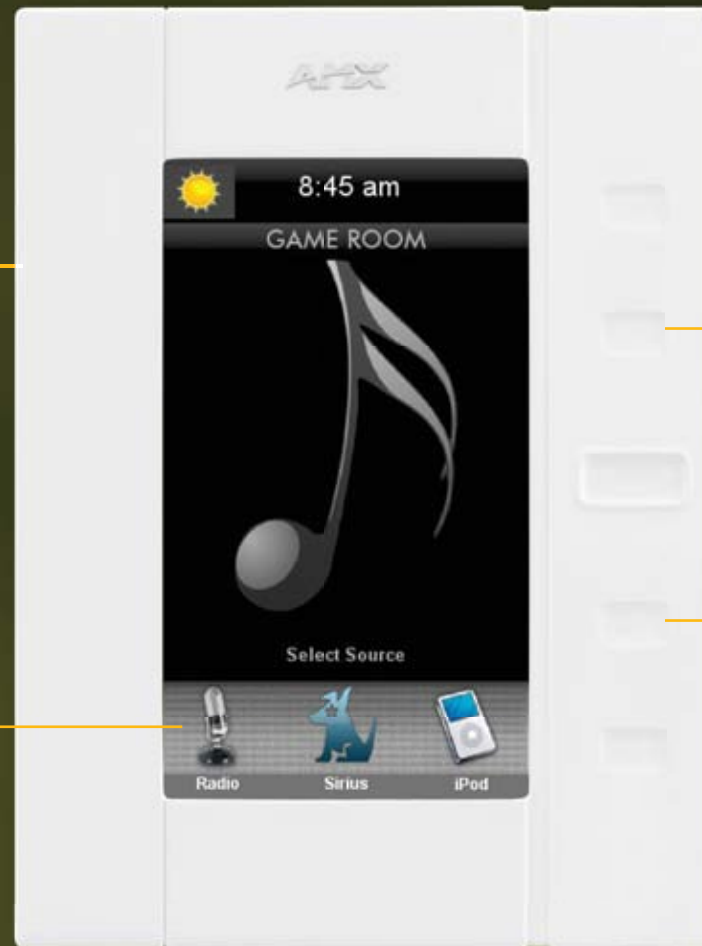

Whether you need to raise or dim the lights, adjust the volume on your iPod, access your Satellite Radio presets or warm the spa to your ideal temperature, the NXD-435P is ideal for getting the job done. To the casual eye, it looks like a 5-button keypad but truth be told, it's actually a full-powered Modero Touch Panel capable of managing infrastructure systems on a Skyscraper or launching jets from an Aircraft Carrier. But it's most handy performing an endless array of domestic duties when wall-mounted in entryways, kitchens, bathrooms and hallways. From arming the alarm and checking the weather to pausing a movie and closing the shades, if there's a need for inconspicuous control, there's an ideal mounting spot for the NXD-435P.

Let There Be Light
The NXD-435P is the ideal size for bathrooms when putting on makeup or shaving and fading the lights up to full to get more light on the subject.

Brilliant Sounds
The ability to access Satellite Radio, CDs and your iPod from anywhere in your home is simple using the NXD-435P.

Cool to the Touch
The convenience of external buttons lets you quickly adjust the AC up or down to keep your home comfortable and energy efficient.

Child's Play
Navigating the NXD-435P is just plain easy. Whether you want to skip songs on your iPod or shuffle - it's all just a touch away from any of the activity buttons on the side of the screen.

ENTRY COMMUNICATIONS NEVER LOOKED THIS GOOD

Wouldn't it be nice to have a doorbell that did things you never dreamed possible? As your visitors drive up, they are greeted at your access gate with a message that says "Welcome to the Harper's". They push the doorbell button and inside, you hear a familiar door tone because you selected it. You go to the nearest touch panel and visually identify your visitors thanks to the integrated camera inside the Communicator. The included microphone and speaker allow you to exchange pleasantries and invite them up the drive. With another press of a button you open the gate right from your touch panel. The Metreau Entry Communicator – taking the doorbell to unimaginable places.

Welcome To The Harper's
Post a friendly personalized
welcome message, your
address and even an image if
you'd like directly on
the display.

Ring My Bell
A dual-color LED light button
is provided for feedback and
doorbell notification. You have
a choice of several different
doorbell tones to choose from.

See And Hear

Not only talk to your visitors but
see them via integrated color
camera, which is easily angled
right, left or center to provide
the best view of the visitor.

Weather Resistant

The Entry Communicator
without integrated display is
weather resistant and ideal for
use in outdoor environments
such as access gates or
outer doors.

EXTREMELY COST EFFECTIVE EXTREMELY SIMPLE TO USE

Schools and government facilities can greatly benefit from device and environment control. These systems free up more time for the end user to focus on the critical needs of their institution instead of wasting it on technology management. But until now, these systems were too costly for school districts and government agencies to even consider. By incorporating the controller right into a very simple controlpad with a simple pushbutton interface, cost is dramatically reduced. The ability to raise/lower projection screens, adjust volume or dim lights has never been easier. And for even more control, Novara ControlPads can be connected to AMX Resource Management Suite Software for keeping devices secure, monitoring lamp hour usage and more – all from anywhere over the Internet. Novara ControlPads offer Education and Government a level of control, efficiency and cost savings like never before.

RMS Compatible

The built-in Ethernet port allows the ControlPad to communicate with AMX Resource Management Suite (RMS) software for enabling web-based remote diagnostics, room management and control of every room on the network.

Simplified Programming

Device Configuration Software (DCS) is used to configure the ControlPad, which means there is no programming required for system setup.

Network Configurable

Configure and update an entire facility or campus simultaneously over your network.

Thousands Await

Works with AMX IR files – leverage thousands of pre-existing AMX IR files on AMX.com.

WHERE BUSINESS TURNS FOR COST EFFECTIVE CONTROL

You own a small law firm and have discovered the possibilities that an AMX control system paired with Mio Modero Classic and Prestige Keypads can offer you to automate your office and make it more energy efficient. With Classic Keypads installed in every conference room, whenever you press “Lights On,” your lights are already dimming to 75% and while practically unnoticeable in light output, you’re cutting energy costs by 25%. You also have several Prestige Keypads in various locations as well that were added because of the flexibility they offer in being able to change the pre-printed paper insert in every button window instantly when you need to change the functionality of your buttons. Mio Modero Classic and Prestige Keypads – where business is turning for cost effective control.

The Choice Is Clear

Clear buttons give Prestige owners the unique ability to change button functions using an included sheet of pre-printed text and icon inserts. Users can also create their own inserts on a printer to further personify their buttons with color font and additional icons.

Touch And You Shall Enjoy

With a press of "CD", your CD player and audio system are turned on and your new Coldplay CD begins playing to get you through prepping your next deposition.

DVD, TV, SAT – It's Your Call

No matter what the source, it's just a press away with the clear, easily identified source and function buttons.

Hit The Lights

By pressing "Lights On," you won't just be increasing light in your office, you'll be increasing the bottom line by only having the lights fade up to 75% full. You won't even notice the difference in light output but you certainly will notice a difference on your bill.

Double-Wide

Two horizontal buttons may be replaced with a double-wide, rectangular button.

Laser Engraving

The Classic utilizes solid, laser-engraved buttons that are personalized with the function or device required.

CAN'T LIVE WITHOUT IT

Your clubs are packed, the car is ready and it's a gorgeous Saturday for golf. You're on your way to play a brand new course even though it's a two-hour drive. As you adjust your ViewStat Thermostat, your 3.5" color display is showing a thunderstorm icon for today's forecast. You hadn't checked the weather and although it's beautiful now, you determine that just about the time you'll be teeing off, storms will be rolling in and ruining your trip. You reschedule for next week and once again, your ViewStat has saved the day. With current conditions, time, date, worldwide five-day forecast, color display and of course, precise temperature control and scheduling, you'll discover why the ViewStat Thermostat quickly becomes a resource you can't live without.

POPULAR TOUCH PANEL ACCESSORIES

Color Display

Features a bright, crisp 3.5" color display to reproduce vivid color images and graphic icons – setting a new standard for thermostats.

Current Weather and Forecasts

Current temperature, weather conditions and a five-day forecast for the local area or any location worldwide are continually updated every 30 minutes.

VIEWSTAT COLOR COMMUNICATING THERMOSTAT

Remote Sense-ability

A convenient remote temperature sensor is included for reading outdoor temperature or the temperature in a second zone.

Thinking Smart: Comfort Recovery Mode

ViewStat begins adjusting the temperature prior to a pre-set time to ensure that your environment is at the temperature you want it when you arrive saving energy.

AUDIO, VIDEO, CONTROL & POWER OVER A SINGLE UTP CABLE

Universal Transmitter Wallplates (UPX) offer unmatched flexibility and convenience in providing classroom, boardroom and conference room visitors a simplified option for routing their audio and video sources to a Total Environment Controller or Cat5 Presentation Switcher located up to 150 feet away - all via a single, cost-effective UTP cable. So whether you need to output a PowerPoint Presentation via your PC's VGA output, show a DVD via component connection or connect a Document Camera with composite out, your signal is clearly delivered using UPX Wallplates. Additionally, all UPX Wallplates include stereo audio inputs and are self-powered via Power Over Ethernet so a single UTP cable is all you'll ever need. UPX Transmitter Wallplates – making meeting room device connections a no-brainer.

Fingertip Control

A single button marked ACTIVE on every UPX Wallplate offers on-the-fly source selection. Simply press to immediately activate that wallplate and source connection.

Blends In

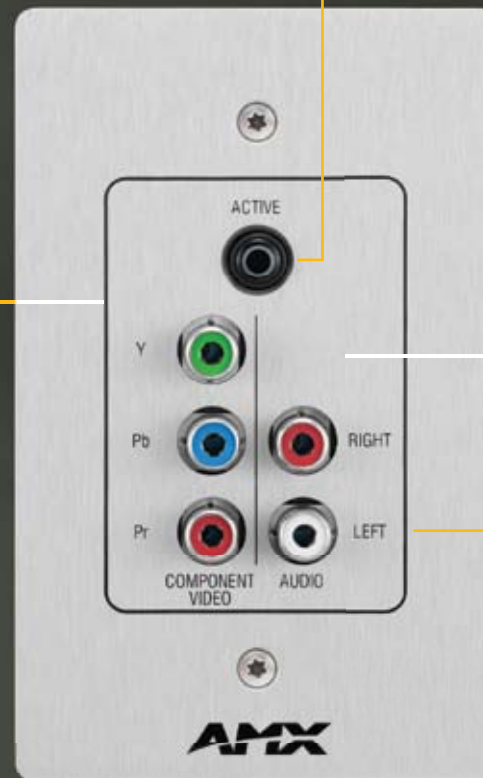

UPX Transmitter Wallplates are available in White, Black and Brushed Aluminum to blend in to a variety of classroom, boardroom and conference room decors.

Fully Powered

For the utmost in convenience, UPX Wallplates require no external power supply and utilize Power Over Ethernet to power the wallplate via the same UTP cable carrying audio, video and control signals.

Plug It In

Supports the most often used device video connections for meeting rooms, conference rooms and boardrooms including Composite, Component and RGB video and stereo audio.
