

Audio in the Home with the PreciDSP by AMX

Enjoy the beauty of amphitheater sound . . .

Bringing high-fidelity audio to your home is now a brilliant way to enhance your lifestyle

Welcome to Precis, the distributed audio solution from AMX that provides brilliant audio to every room in your home with style and convenience

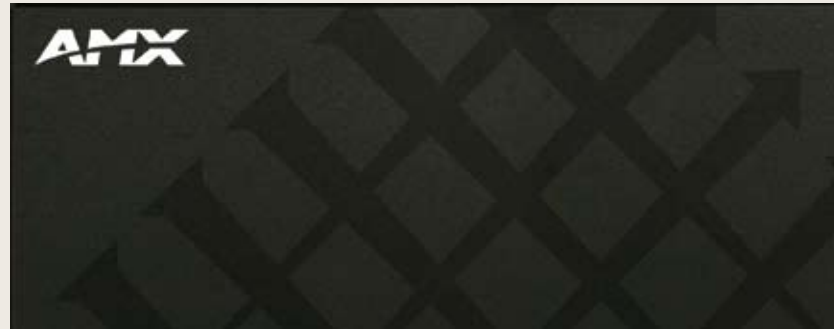

Realize the absolute beauty of sound as you walk from room to room in your home. You will truly enjoy the full spectrum of rich musical tones as if it were live. AMX audio solutions are specifically designed for the discerning audio connoisseur with a considerable number of audio sources. AMX uses a Digital Signal Processor with the flexibility to either simply adjust simple treble and bass or continue customization all the way through 10-Band equalization. Experience sound customized for the unique architectural attributes of every room in your home.

AMX offers a range of distributed audio solutions that accommodate multiple audio sources and room/zones. For those with an affinity for high-end, high-fidelity, brand name equipment, AMX integrates any CD, DVD, IPOD audio; AM, FM radio; XM, Sirius satellite radio equipment – in every room/zone of your home. Our distributed audio solutions offer you a reliable, flexible, expandable, sophisticated and intuitive way to listen to music in your home.

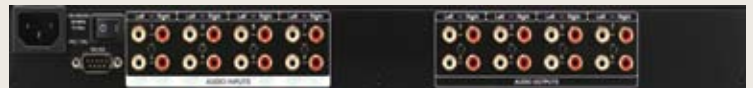

A wide selection of stylish keypads, remote controls, and touch panels can be integrated into each room/zone to provide centralized control. Customize any user interface with your favorite playlists, radio stations, and macro events for quick access to the music you want to hear.

AMX Precis Advantages

AMX Planning for the Automated Home of the Future – Today

Welcome to luxury, convenience and simplicity in your automated home. Here your unified system integrates and controls all your audio/video, environmental and communication technologies to suit your lifestyle. AMX understands complex technology and makes it simple and convenient to use. In short, life just got a whole lot easier.

From distributed video systems to automated lighting and sublime multimedia rooms, it takes careful planning to design and install technology that complements your home and lifestyle. An automated home isn't science fiction any more. In fact, it's even easier than you might think. With an authorized AMX Integrator, you'll receive expert design assistance from the start. Your fully customized, ingeniously automated system will simplify the use of multimedia, communication, lighting, security, climate control and more.

Planning for the future should include thinking about how your home technology needs might extend beyond a distributed audio system. By considering these expansion plans now, your AMX Integrator can work closely with your architect, builder or interior designer in the initial planning stages to implement a "future-proof" solution that eliminates growing pains. Automating your home represents a significant investment in your home and in technology. To protect your investment's long-term value, you'll want to be sure that your home and system will easily accommodate new innovations in multimedia, networking and communications formats, as well as your family's changing needs. With AMX and our authorized AMX Integrators, future equipment and programming upgrades, as well as capabilities add-ons, are part of the initial system design and ongoing technical support strategy.

Movie Magic Lower the screen, dim the lights and start the movie - "Action!"

Start the Day Watch the news, check the weather and warm up the car - with a single touch.
